

## Claims

We Claim:

1. A vapor-dispensing device comprising:
  - a first volatizable material;
  - a second volatizable material separately contained from said first volatizable material; and
    - a common delivery system communicating with said first and second volatizable materials, said delivery system configured to facilitate evaporation of said first volatizable material and said second volatizable material into an environment.
2. The vapor-dispensing device of claim 1, wherein said first volatizable material includes a first fragrance and said second volatizable material includes a second fragrance.
3. The vapor-dispensing device of claim 1, wherein said first and second volatizable materials are physically attached to said delivery system.
4. The vapor-dispensing device of claim 1, wherein said delivery system comprises
  - a transfer mechanism;
  - an evaporation region; and
  - a controller configured to modulate the amounts of said first and second volatizable materials evaporated into said environment.
5. The vapor-dispensing device of claim 4, wherein said transfer mechanism is physically attached to said delivery system.
6. The vapor-dispensing device of claim 4, wherein said transfer mechanism comprises
  - a first wick structure communicating with said first volatizable material and said evaporation region; and

a second wick structure communicating with said second volatizable material and  
said evaporation region.
